

Filtered Shift Analysis Summary (late)

Shifted TAD boundaries with $\geq 10\text{kb}$ (1 bin) shift distance | $n = 368$

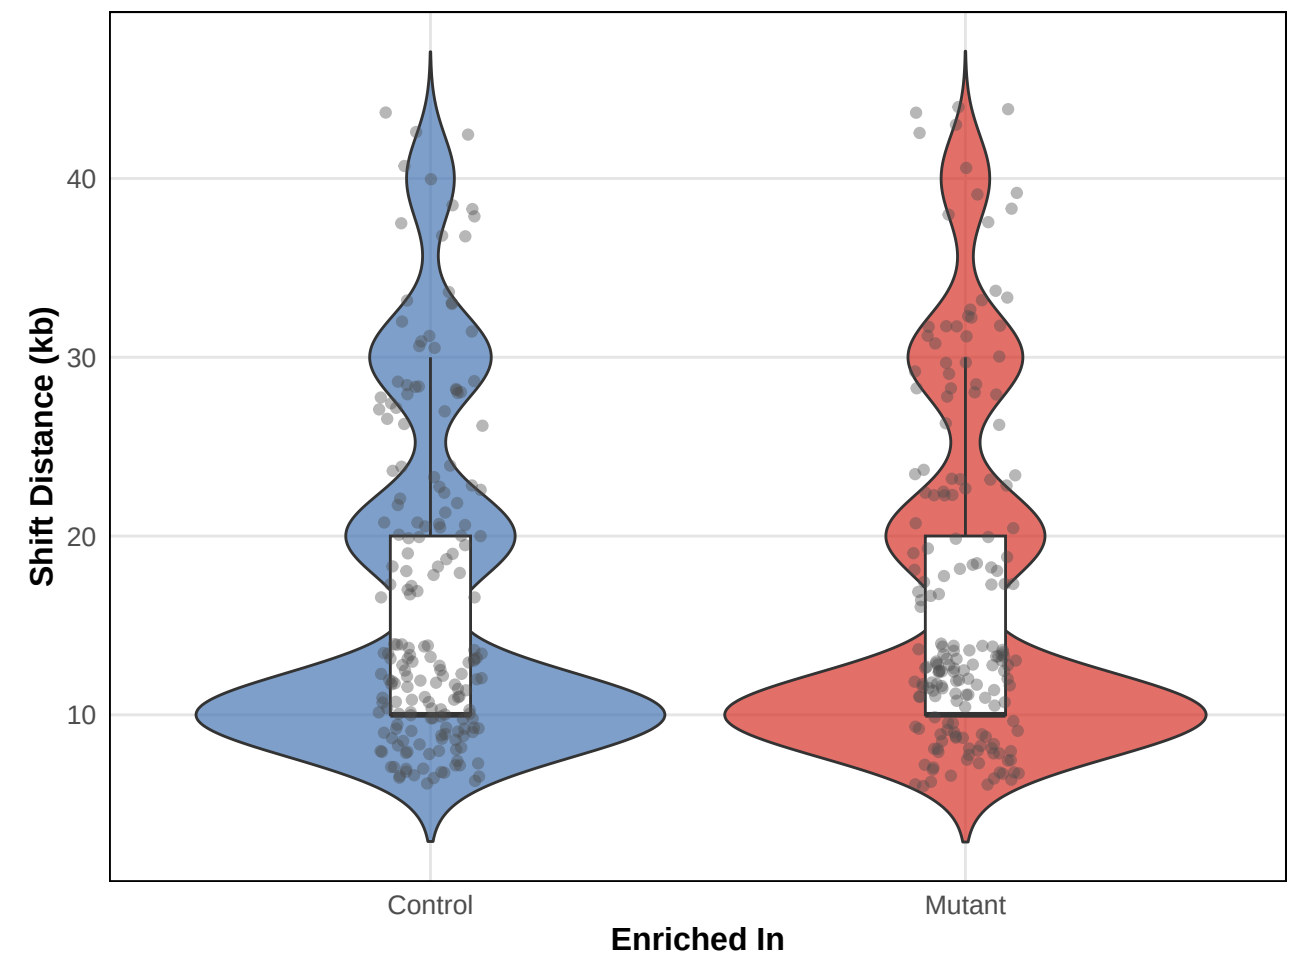

Shift Distance Distribution (Filtered)

Shifted boundaries $\geq 10\text{kb}$ ($n = 368$) | Median = 10.0 kb | late

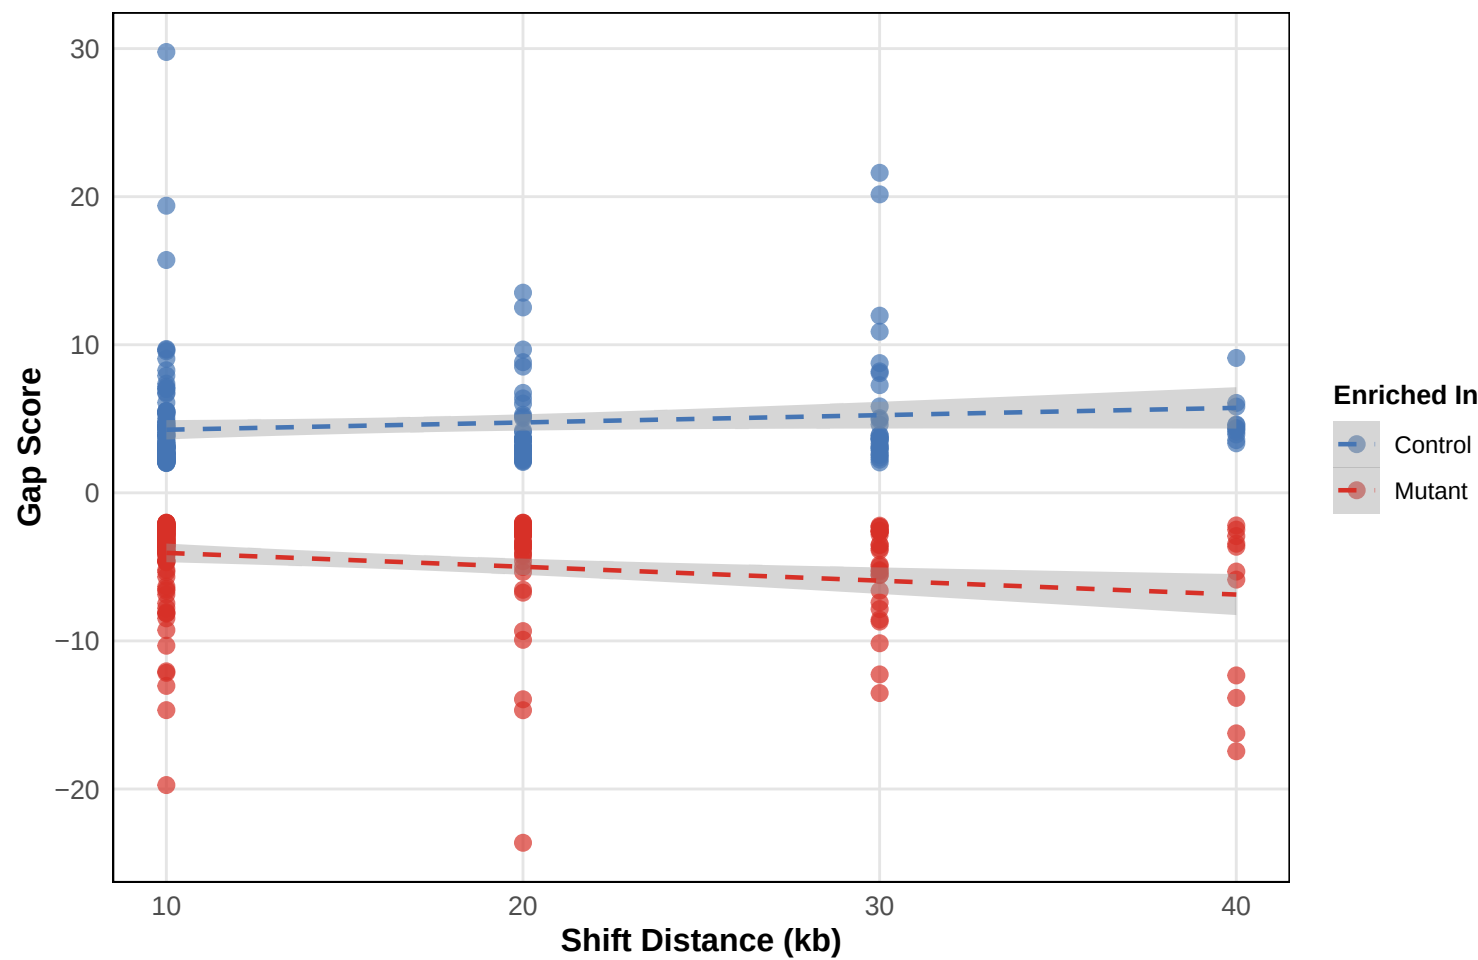

Shift Distance by Enrichment Direction (Filtered)

$n = 368$ boundaries | late

Shift Distance vs Gap Score (Filtered)

Do larger shifts correlate with stronger differential signal? | late

Shift Distance Bins by Enrichment Direction

Filtered to $\geq 10\text{kb}$ shifts | $n = 368$ | late
