

Polycomb Target Gene Enrichment in BAP1-KO Methylation Changes

Dual-mechanism prediction: Polycomb targets depleted from hypermethylation (heterochromatin inaccessible to DNMT3A)

mC DMR Status: Polycomb Targets vs Non-Polycomb

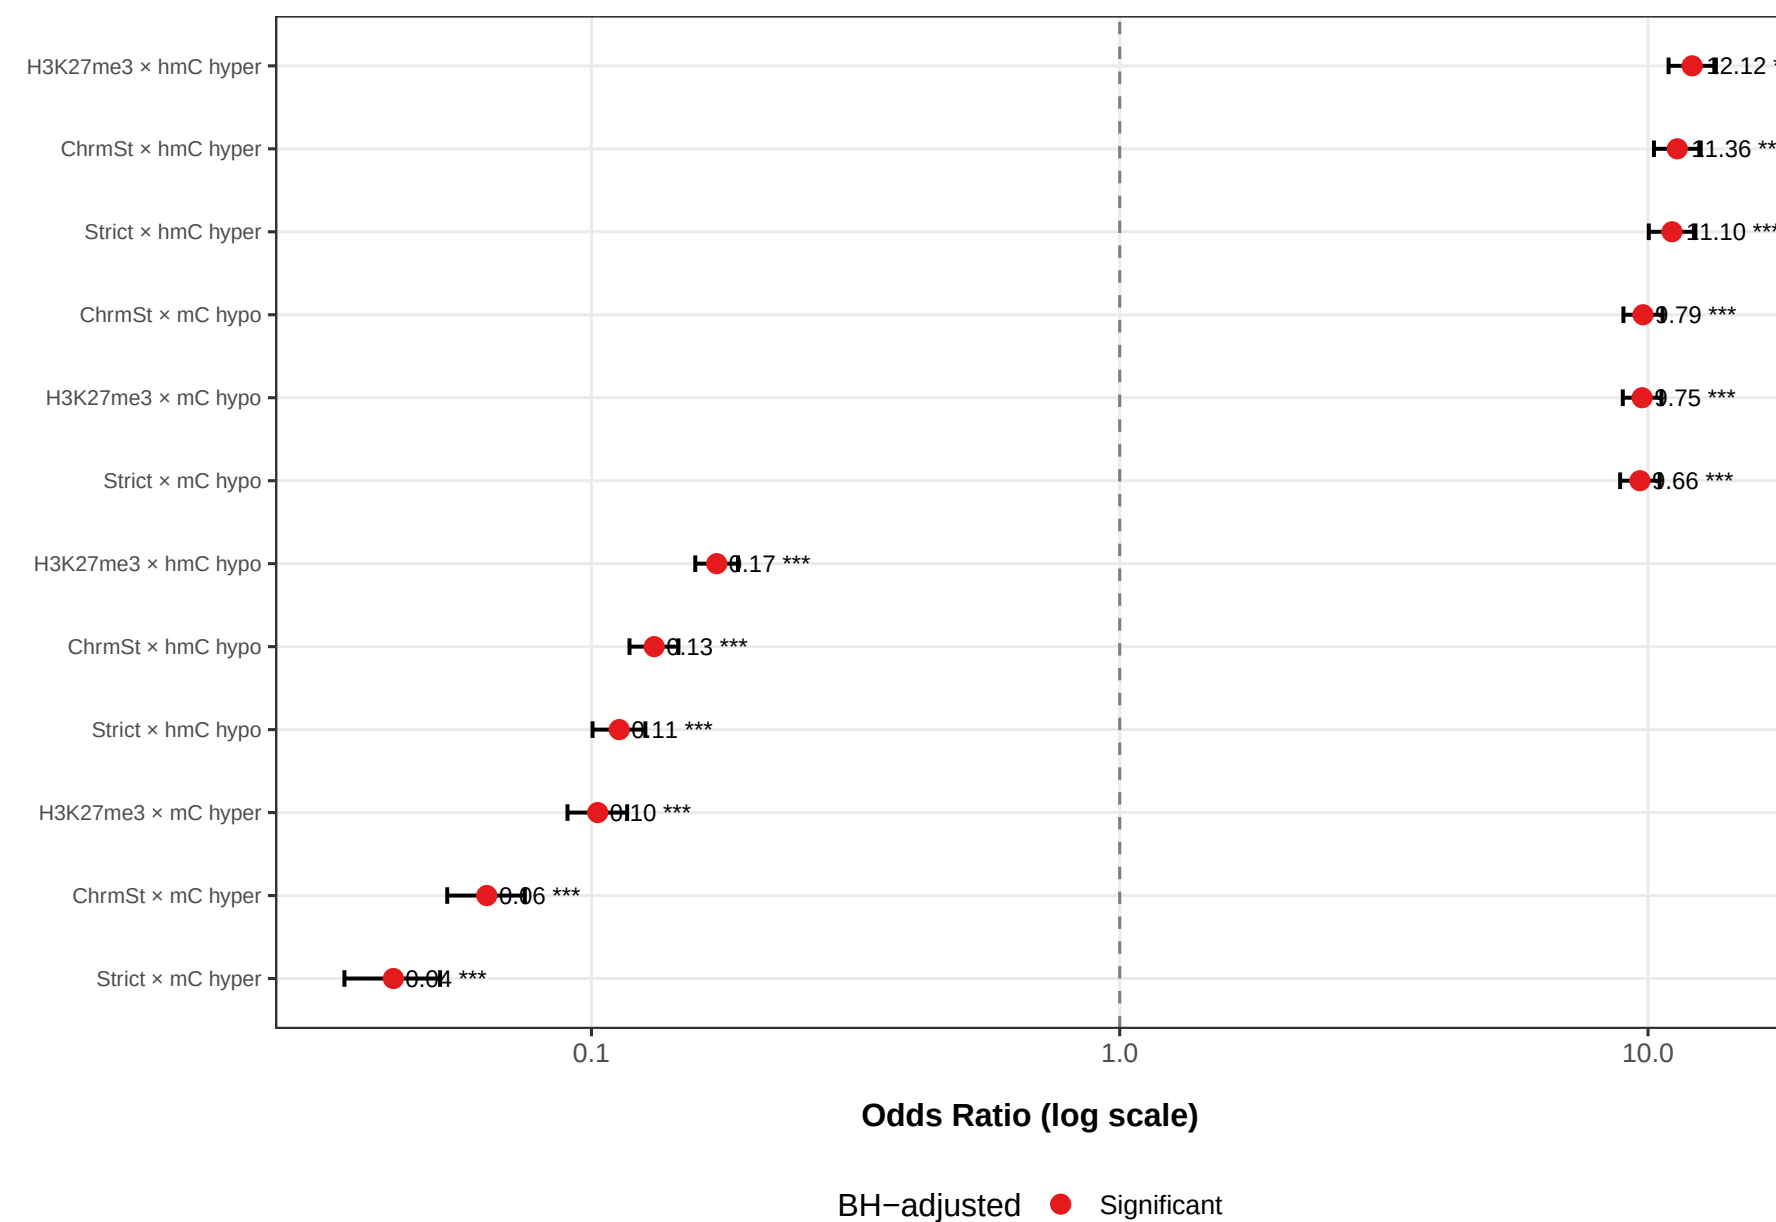

Polycomb = Repressed_Promoter + Polycomb + Bivalent (n=3446) | Non-Polycomb (n=17469)

mC status ■ Hypermethylated ■ Hypomethylated ■ Not significant

Polycomb Target Enrichment in DMRs

Odds Ratios with 95% CI (BH-corrected significance)

Hypermethylation Rate by Chromatin State

Fisher's exact test vs all other states (BH-corrected: *** <0.001, ** <0.01, * <0.05)
