

Artifact Documentation: CHG and CHH Significant Gene Lists Are Identical

Identical lists + $r \sim 1.0$ effect sizes indicate shared statistical artifact, not independent biology

CHG vs CHH Significant mC Gene Overlap

Shared: 320 / 320 total (100.0% identity)

CHG vs CHH mC Effect Size at Significant Genes

Pearson $r = 1.0000$ ($n = 320$ genes)
