

Boundary-Loop Cross-Reference: Late Timepoint

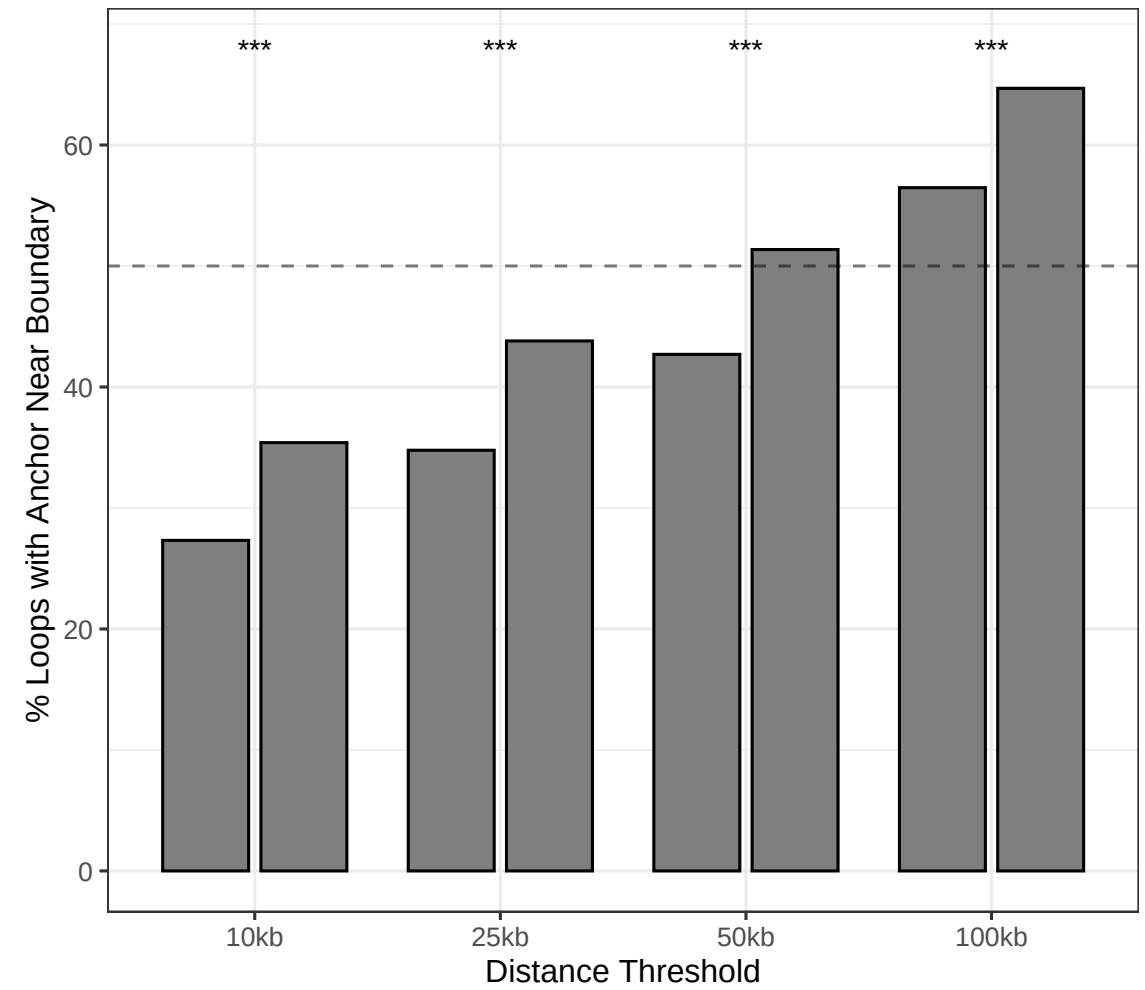

Loop Anchor Distance to Differential TAD Boundaries

Late Timepoint | Wilcoxon $p = 4.03e-09$ | Lost median = 44,999, Gained median = 74,999

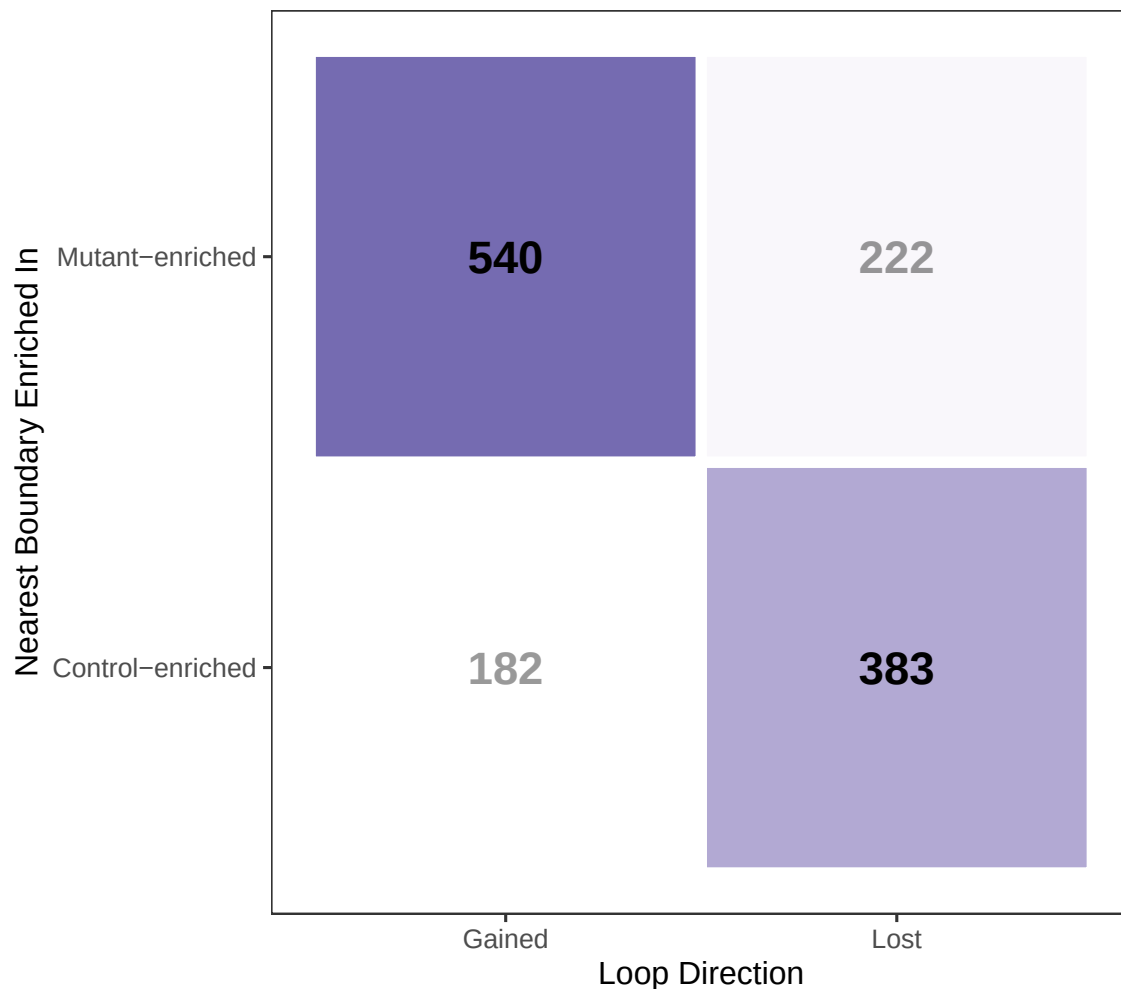

Proportion of Loops Near Differential Boundaries

Late Timepoint

Loop Direction × Boundary Enrichment Concordance

Late Timepoint | Concordance rate: 69.6% ($\chi^2 p = 0.0005$)

Boundary Type Association with Loop Direction

Late Timepoint | OR > 1 = enriched in gained loops
